326*	900	600	450	64

*Mounting Clamp for Twin Pipestands on 450mm CTRS.

Options

310/320 Series enclosures can be supplied fitted with any of our full range of accessories covering heating, ventilation, cable/tubing entries, viewing and tagging systems.

The design of this range gives clear access to the front when open, making it particularly suitable for use with base-mounted enclosure manifolds (these can also be mounted on the rear wall to give horizontal impulse/vent line entry). The rear wall can be used for mounting accessories, or for wall-mounting of the enclosure.
